Dr. Rafal is the Medical Director of the Rehabilitation Hospital of Rhode Island/Fibromyalgia Program and at Healing Choices an interdisciplinary practice specializing in the treatment and rehabilitation of patients with a diagnosis of Fibromyalgia and other chronic medical conditions. He is Board Certified in Physical Medicine and Rehabilitation and has additional training in homeopathy, behavioral medicine and western herbal medicine. At Healing Choices the team focus is on powerful non prescription options that support the health of the patient. In addition to an individualized integrated treatment approach we recognize the power that our beliefs have when it comes to health and healing.

Testimonial:

Sunlight Saunas provides a far infrared sauna that as part of a comprehensive program can be very helpful for patients living with a variety of medical conditions. We see a lot of patients who have chronic pain from Fibromyalgia and Arthritis who could benefit from this approach. This treatment also helps alleviate the negative impact that stress can contribute to our state of health and wellbeing. Given the number of environmental toxins that we are exposed to on a regular basis, a detoxification program with a Sunlight Sauna is an important addition to a comprehensive program for patients with a variety of chronic medical conditions. The use of infrared heat is based upon an ancient healing wisdom that has been incorporated over the ages among many cultures.
