Community Solocarbon[®] Infrared Sauna Panels

The Community sauna is our largest sauna model. For seamless craftsmanship, each wall consists of one large wooden panel:

- Roof & Floor Panels
83.4" x 72.1" x 2.75" thick (see diagram)
- Roof & Floor Panels
80.5" x 65.4" x 2.75" thick (see diagram)
- Side Panels
69.5" x 65.4" x 2.75" thick

Fitting into your home:

Because of the large panel size, it is important to ensure there is enough space through the doors and pathways to the sauna's location in your home. Standard doors in the US are 30" to 36" wide, and 6' to 8' tall. Please measure any doorway or hallway needed prior to purchase
